

ICS 180C

20 Carriers // 13 Injected Chemicals // 20 Premix Products

FEATURES & SPECIFICATIONS

Outputs

46 Configurable Outputs
2 Dry Contact Outputs

Loadout

2 Loadout Points per System
8 Loadouts Points per Mix Plant

Custom Options

Unattended Loadout Bays
Expansion I/O
Tank Level

Inputs

4 High Speed Meter Inputs
2 Ethernet Meter Inputs
13 Standard Meter Inputs
2 Serial Scale Inputs
4 (4-20mA) Analog for Display

Systems

2 Systems and/or Mix Plants Max
1 Premix Skid Per System Max
20 Products Can Be Recirculated
Systems May Run Simultaneously

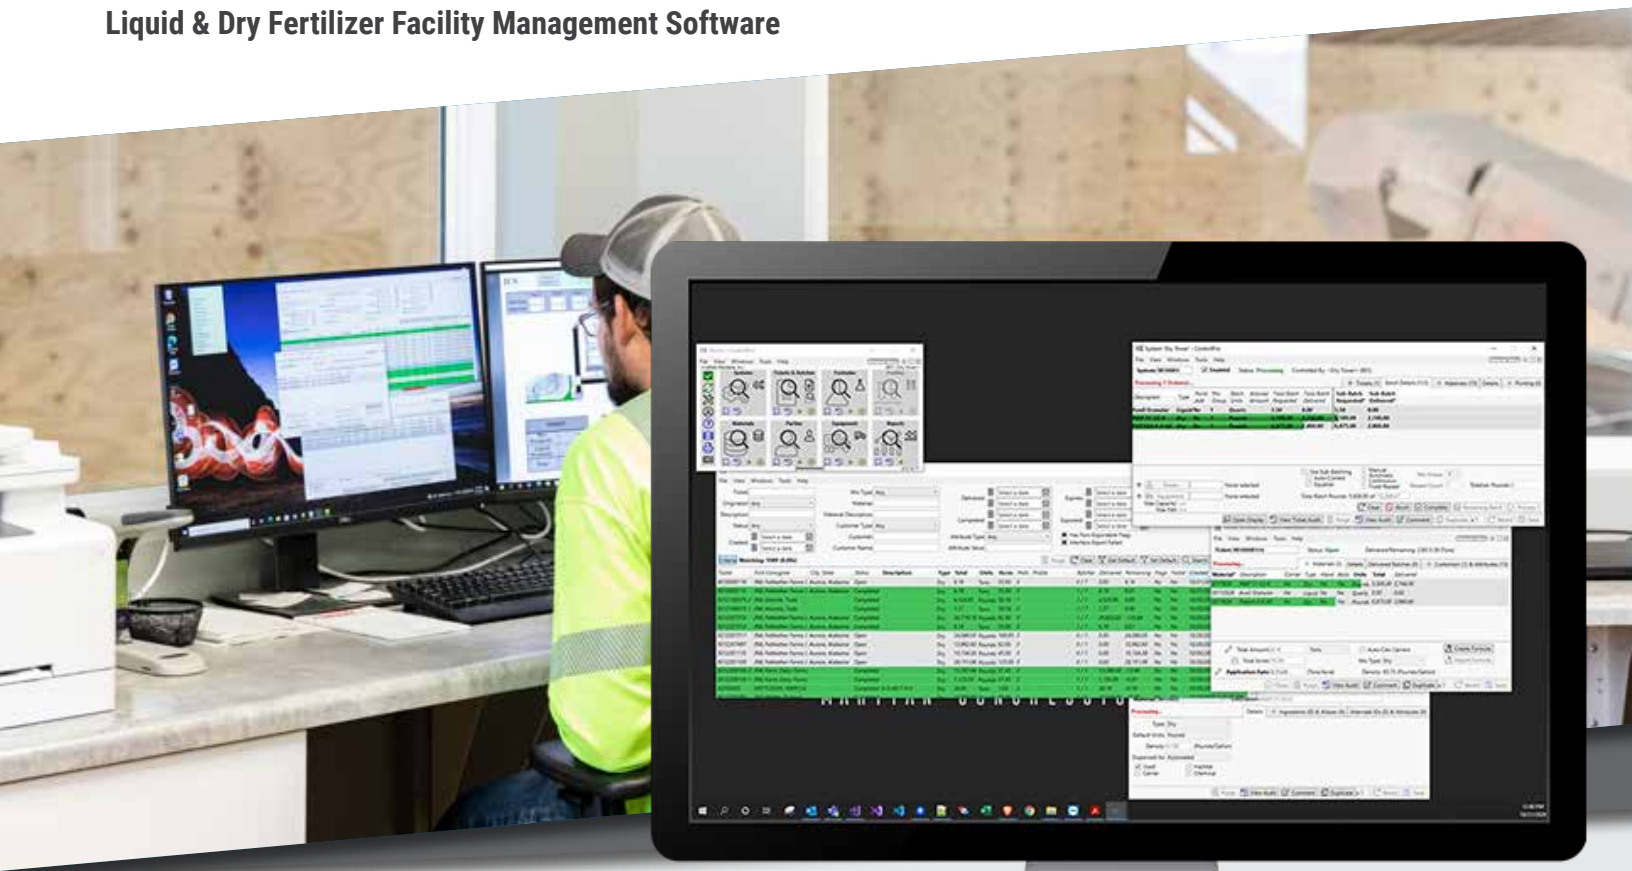

Premix Skid

Load Out to 1-2 System Lines
Single Product Batches
Auto Flush if Water on Ticket

Liquid & Dry Fertilizer Facility Management Software

SOFTWARE HIGHLIGHTS

Liquid AND Dry Fertilizer

Manage all your agronomy facilities with the same software whether liquid or dry, retail or wholesale.

Batches & Loads

Split or combine batches as needed for fast and accurate delivery.

Inventory Management

Use transactions and/or sensors to prevent runouts and keep tabs on inventory across locations.

Unattended Loadout

Service customers and/or other locations with 24/7 loadout.

Agromony/ERP Integration

Run ControlPro standalone or interface with 3rd party software.

Systems Control

Send ticket batches to one or more systems for production and loadout.

Drivers & Equipment

Improve communication and audit trails with drivers and equipment dispatching tools.

Billing & Customer Service

Increase billing and load accuracy while also improving communication with customers.
