

# ICS 160

16 Product Inputs (Any Combination of Carriers, Injected Chemicals, Premix Products)

## FEATURES & SPECIFICATIONS

### Outputs

28 Configurable Outputs  
4 Auxiliary Outputs

### Loadout

1 Loadout Point per System  
1 Loadout May Run at a Time

### Custom Options

Unattended Loadout Bays  
Mix Plants  
Expansion I/O  
Ethernet Meters  
Serial Scales  
Tank Level

### Inputs

2 High Speed Meter Inputs  
12 Standard Meter Inputs

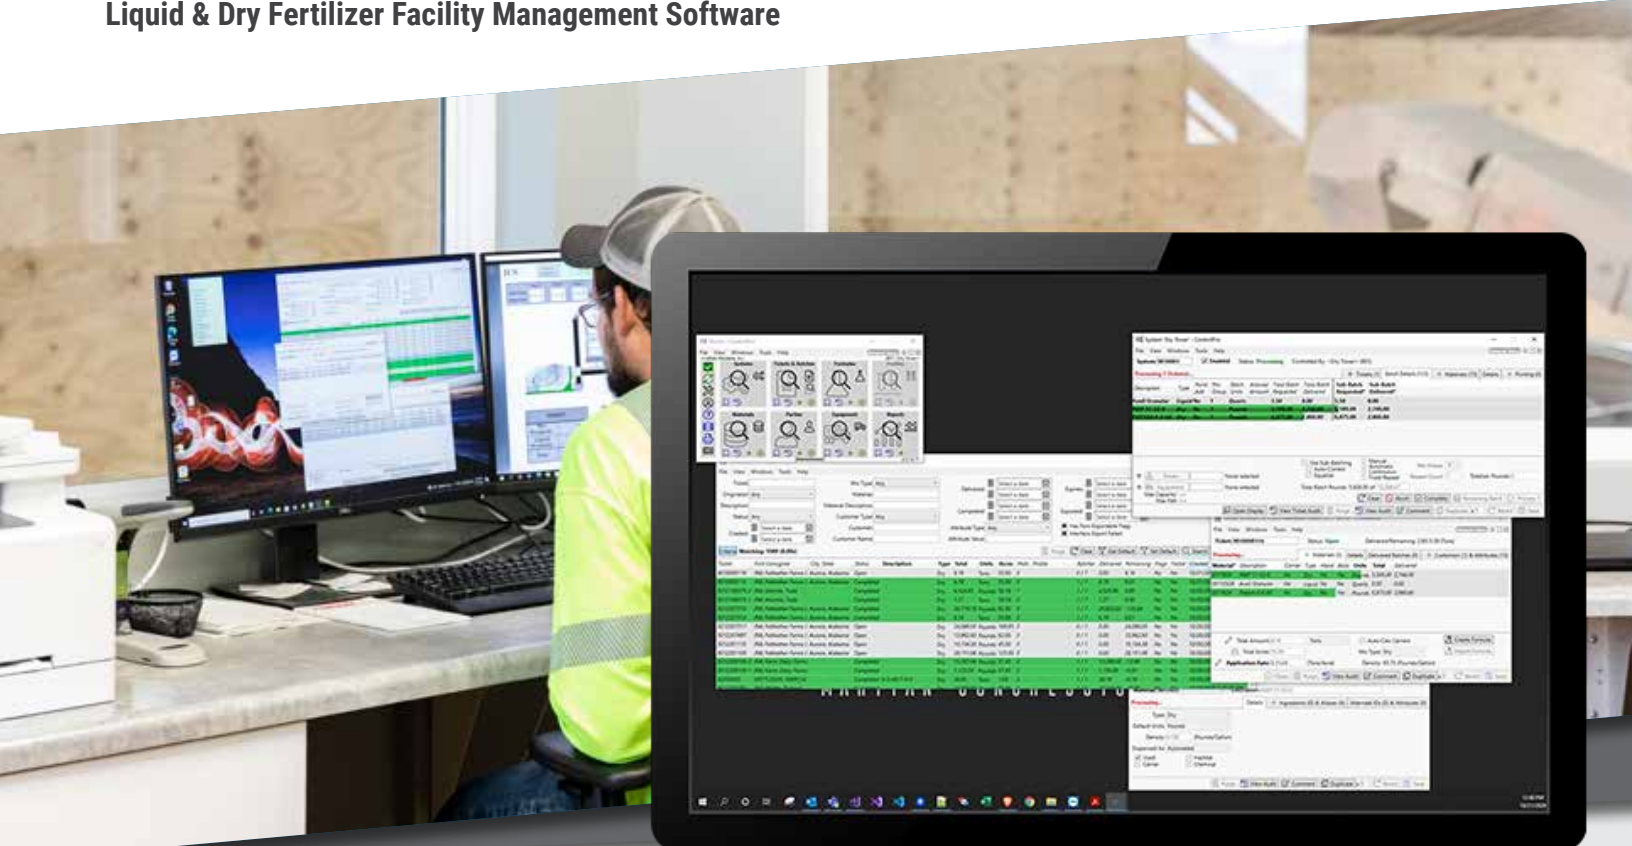

### Systems

3 Systems Maximum  
16 Products Can Be Recirculated

Liquid & Dry Fertilizer Facility Management Software

# SOFTWARE HIGHLIGHTS

**Liquid AND Dry Fertilizer**  
Manage all your agronomy facilities with the same software whether liquid or dry, retail or wholesale.

**Batches & Loads**  
Split or combine batches as needed for fast and accurate delivery.

**Inventory Management**  
Use transactions and/or sensors to prevent runouts and keep tabs on inventory across locations.

**Unattended Loadout**  
Service customers and/or other locations with 24/7 loadout.

**Agronomy/ERP Integration**  
Run ControlPro standalone or interface with 3rd party software.

**Systems Control**  
Send ticket batches to one or more systems for production and loadout.

**Drivers & Equipment**  
Improve communication and audit trails with drivers and equipment dispatching tools.

**Billing & Customer Service**  
Increase billing and load accuracy while also improving communication with customers.
