

ICS 240C

20 Carriers // 25 Injected Chemicals // 20 Premix Products

FEATURES & SPECIFICATIONS

Outputs

- 64 Configurable Outputs
- 6 Auxiliary Outputs
- Up to 4 Expansion Panels

Loadout

- 2 Loadout Points per System

Custom Options

- Unattended Loadout Bays
- Simple Mix Plants
- Tank Level

Inputs

- 4 High Speed Meter Inputs
- 4 Ethernet Meter Inputs
- 25 Standard Meter Inputs
- 2 Remote Start Inputs
- 2 Remote Stop Inputs
- 2 Serial Scale Inputs
- Up to 2 Add'l Serial Scale Inputs

Systems

- 4 Systems Max
- 1 Premix Skid Per System Max
- 30 Products Can Be Recirculated
- Systems May Run Simultaneously

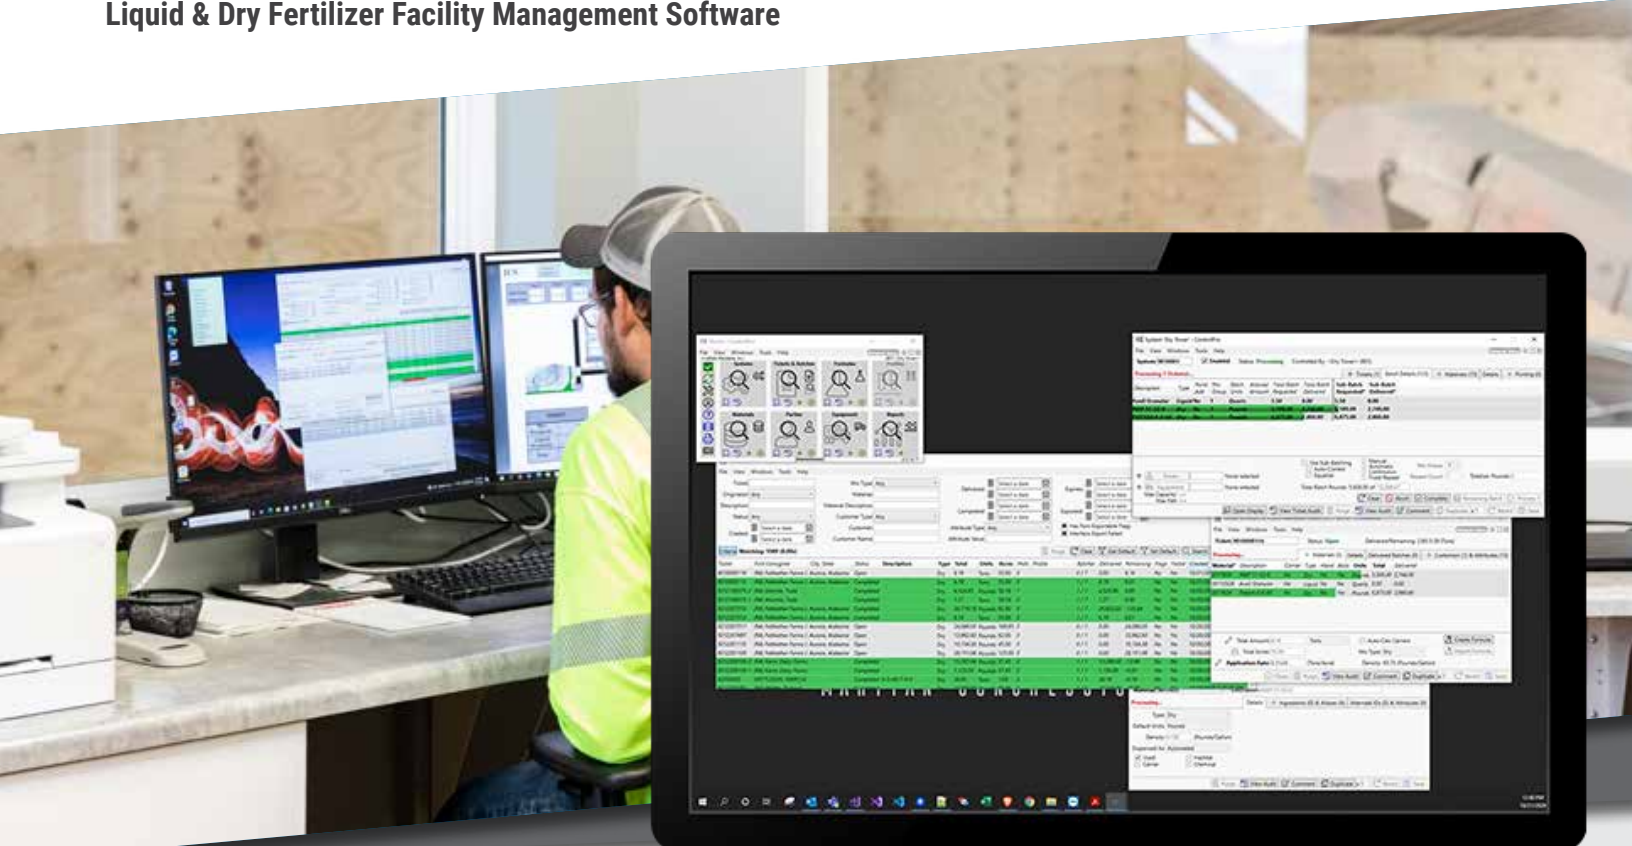

Premix Skid

- Load Out to 1-2 System Lines
- Single Product Batches
- Auto Flush if Water on Ticket

Liquid & Dry Fertilizer Facility Management Software

SOFTWARE HIGHLIGHTS

Liquid AND Dry Fertilizer
Manage all your agronomy facilities with the same software whether liquid or dry, retail or wholesale.

Batches & Loads
Split or combine batches as needed for fast and accurate delivery.

Inventory Management
Use transactions and/or sensors to prevent runouts and keep tabs on inventory across locations.

Unattended Loadout
Service customers and/or other locations with 24/7 loadout.

Agronomy/ERP Integration
Run ControlPro standalone or interface with 3rd party software.

Systems Control
Send ticket batches to one or more systems for production and loadout.

Drivers & Equipment
Improve communication and audit trails with drivers and equipment dispatching tools.

Billing & Customer Service
Increase billing and load accuracy while also improving communication with customers.
