(Actual product count depends on meter type & plumbing.)

ControlPro

Liquid & Dry Fertilizer Facility Management Software

SOFTWARE HIGHLIGHTS

Liquid AND Dry Fertilizer

Manage all your agronomy facilities with the same software whether liquid or dry, retail or wholesale.

Batches & Loads

Split or combine batches as needed for in-field time savings and accurate delivery.

Inventory Management

Use transactions and/or sensors to manage inventory and monitor inventory across locations.

Unattended Loadout

Service customers and/or other locations with 24/7 loadout.

Subscription-Based Software

Stay competitive with the latest software innovations thanks to our PaaS model. Receive updates on the fly.

Agronomy/ERP Integration

Run ICS ControlPro® standalone or interface with 24 different 3rd party software.

Systems Control

Send ticket batches to one or more systems for production and loadout.

Drivers & Equipment

Improve communication and audit trails with drivers and equipment dispatching tools.

Billing & Customer Service

Increase billing and load accuracy while also improving communication with customers.

Weights and Measures Approved

The only industry software NTEP Certified with NTEP Devices. NTEP CC: 23-053
